Biography

Cory Hauberg is a Mechanical Engineer who joined YA in 2023 with over 30 years of experience as a design and manufacturing professional in the automotive and manufacturing industries. Throughout his career, Mr. Hauberg has been responsible for designing, developing, and managing specialized industrial production equipment for manufacturing automobiles and light trucks throughout Honda's North American footprint. Early in his career, he utilized his communication and negotiating skills to support designing equipment and coordinating with R&D to ensure the manufacturability of new model designs in the automotive industry. For the past 17 years, Mr. Hauberg has managed concept development, project management, and evaluation for the application of capital investment for highly specialized automotive manufacturing automation. He brings a wealth of equipment and project management expertise to YOUNG & Associates.
