Dallas, TX

Biography

Jeff joined YOUNG & Associates in 2022. For over twenty years, Jeff has been involved in the management of company teams, project estimation & engineered roof design. Jeff is proficient in using architectural blueprints and site assessment data to build efficient roof systems. His designs are focused to optimize energy efficiency, increase waterproofing and watershed. In his career, he has over 15 years successfully identifying deficiencies in existing roof systems. In 2015 Jeff designed an intuitive based estimation software for efficient building takeoffs and cost evaluation.
