Biography

Jeff Sanchez holds a B.S. in Civil Engineering with an emphasis in structural engineering from the United States Coast Guard Academy. He is a professional engineer with 20+ years of experience in civil engineering, construction project management, and forensic engineering investigations. He has 12+ years of experience in designing, constructing, and maintaining federal and state highway transportation projects. He holds a Professional Traffic Operations Engineer (PTOE) Certification from the Transportation Professional Certification Board. His forensic investigation background includes commercial and residential construction, building envelope, structural, premises liability, and traffic and highway construction-related investigations.
